The University of Oregon

Psychology

Ulrich Mayr, Department Head
541-346-4921
Straub Hall
1227 University of Oregon
Eugene, Oregon 97403-1227

The mission of the Department of Psychology undergraduate program is to educate students about the major research findings and theories in the field of psychology, and to train them to use an empirical approach to understanding human behavior. Specifically, the program endeavors to provide students with

- Broad exposure to the basic concepts and ethical issues of psychology
- Education in the scientific method, including applied research opportunities
- Strong critical-thinking and written-communication skills, including the ability to evaluate and convey the evidence for claims regarding human behavior
- Experience through internship and practicum opportunities at partnering community organizations

Faculty

Dare A. Baldwin, professor (language acquisition, semantic development, cognitive development). BA, 1982, California, Berkeley; MSc, 1984, California, Santa Cruz; PhD, 1989, Stanford. (1993)

Dagmar Zeithamova Demircan, assistant professor (cognitive neuroscience, memory). MA, 2003, Charles University, Prague; PhD, 2008, Texas, Austin. (2014)

Philip A. Fisher, professor; Philip H. Knight Chair, Department of Psychology (prevention research, stress neurobiology, foster care). BA, 1986, Bowdoin College; MS, 1990, PhD, 1993, Oregon. (2008)

Pranjal Mehta, assistant professor (social neuroscience, status hierarchies, social decision-making). BA, 1999, Williams College; PhD, 2007, Texas, Austin. (2011)

Emeriti

Ray Hyman, professor emeritus. AB, 1950, Boston University; MA, 1952, PhD, 1953, Johns Hopkins. (1961)

Daniel P. Kimble, professor emeritus. BA, 1956, Knox; PhD, 1961, Michigan. (1963)

Peter M. Lewinsohn, professor emeritus. BS, 1951, Allegheny; MA, 1953, PhD, 1955, Johns Hopkins. (1965)

Richard A. Littman, professor emeritus. AB, 1943, George Washington; PhD, 1948, Ohio State. (1948)

Richard Marrocco, professor emeritus. BA, 1965, California, Los Angeles; PhD, 1972, Indiana. (1973)

Michael I. Posner, professor emeritus. BS, 1957, MS, 1959, Washington (Seattle); PhD, 1962, Michigan. (1965)

Mary K. Rothbart, professor emerita. BA, 1962, Reed; PhD, 1967, Stanford. (1969)

Myron Rothbart, professor emeritus. BA, 1962, Reed; PhD, 1966, Stanford. (1969)

Marjorie Taylor, professor emerita. BS, 1979, MS, 1981, Acadia; PhD, 1985, Stanford. (1985)

Robert L. Weiss, professor emeritus. BA, 1952, PhD, 1958, State University of New York, Buffalo. (1966)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

- Bachelor of Arts
- Bachelor of Science
- Minor

Undergraduate Studies

All students participate in and collaborate on research as part of the academic course sequence. Students are encouraged to gain additional research experience through research assistant positions in faculty labs and the undergraduate honors thesis program. The psychology major affords students great flexibility in selecting upper-division courses to fit individual goals and interests. Classroom and internship opportunities are enriched by numerous faculty research programs that range in levels of analysis and intellectual focus. An undergraduate degree in psychology provides the background for a broad range of careers, including social services, education, law, or graduate programs in psychology.

Preparation

High school preparation should include courses in social sciences as well as the natural sciences (physics, biology, chemistry). Language and mathematical skills are also highly desirable. In general, the broad liberal-arts training that prepares students for college studies is appropriate for majoring in psychology at the university.

Careers

Some students major in psychology to prepare for graduate training and careers in related fields such as personnel relations, vocational and personal counseling, medicine and dentistry, social and case work, marketing, administration, the legal profession, or counseling in the public schools. Others prepare for careers as academic psychologists (teaching and research), clinical psychologists (mental health centers, institutions, and private practice), industrial and organizational psychologists, and government psychologists (testing, research, and administration).

Career information is also available on the American Psychological Association website.

Review of Courses

Lower-Division Courses

Among lower-division courses, psychology is introduced as a social science by the following courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>PSY201</td>
<td>Mind and Brain</td>
<td>4</td>
</tr>
<tr>
<td>PSY304</td>
<td>Biopsychology</td>
<td>4</td>
</tr>
<tr>
<td>PSY202</td>
<td>Mind and Society</td>
<td>4</td>
</tr>
<tr>
<td>PSY330</td>
<td>Thinking</td>
<td>4</td>
</tr>
<tr>
<td>PSY348</td>
<td>Music and the Brain</td>
<td>4</td>
</tr>
<tr>
<td>PSY366</td>
<td>Culture and Mental Health</td>
<td>4</td>
</tr>
<tr>
<td>PSY376</td>
<td>Child Development</td>
<td>4</td>
</tr>
<tr>
<td>PSY380</td>
<td>Psychology of Gender</td>
<td>4</td>
</tr>
</tbody>
</table>

Transfer students should plan to take no more than two lower-division courses before starting upper-division work. The introductory courses should be chosen with an eye toward prerequisites for upper-division courses and toward providing a broad background in the field. Transfer equivalents for lower-division courses are evaluated case by case. Check with the department’s head advisor to determine equivalency of completed introductory work.

Upper-Division Courses

Upper-division courses fall into three categories:
1. Courses that teach research skills and methodologies (Statistical Methods in Psychology (PSY302) and Research Methods in Psychology (PSY303)).

2. Other 300-level courses are of broad interest to many different majors throughout the university as well as to psychology majors.

3. Area courses, numbered 410 to 480, designed for psychology majors, may be open to other students who fulfill the prerequisites by obtaining instructor approval.

### Group Requirements

For psychology courses approved to fulfill social science or science group requirements, see the current course list on the registrar’s website, registrar.uoregon.edu/common/group_courses.php.

### Major Requirements

Required courses must be taken for letter grades and passed with C– or better. Elective psychology courses may be taken pass/no pass. Students must take 12 elective credits, 8 of which must be actual content courses.

### Bachelor of Arts Degree Requirements

#### Additional Requirements

12 credits of biology, any level; or 12 credits of chemistry, any level; or 12 credits of physics, any level

### Total Credits

48

---

1. Should be completed by the end of sophomore year.
2. Required courses must be taken for letter grades and passed with C– or better.
3. Should be completed by the end of junior year.
4. A total of 36 credits must be from courses in the upper division. A maximum of 4 credits in any Research: [Topic] (PSY401) or Practicum: [Topic] (PSY409) may be applied to the upper-division credits. Practicum credits must be earned at a practicum site approved by the head undergraduate faculty advisor.
5. Elective psychology courses may be taken pass/no pass. Students must take 12 elective credits, 8 of which must be actual content courses.

5. Elective psychology courses may be taken pass/no pass. Students must take 12 elective credits, 8 of which must be actual content courses.
Planning a Program

Besides attending lecture courses, students may participate in seminars, reading and conference courses, laboratory work, and other means of gaining experience. Departmental requirements for a psychology major are designed to maximize individual curriculum planning. Students are encouraged to schedule frequent consultations with their advisors to ensure completion of all requirements. Peer advisors can help students create a two- or four-year plan.

Sample Program

The sample program shown provides an idea of a typical course load during the freshman year for a student working on a bachelor’s of science.

First Year

Total Credits: 48

Departmental requirements for a psychology major are designed to maximize individual curriculum planning. This should be done in close and frequent consultation with the advisor.

Peer Advising

The psychology department’s peer advisors work to make academic advising more effective, welcoming, and efficient. Questions about the university system and specific inquiries about the department’s norms, opportunities, and courses are welcome. During the academic year, the peer advisors hold regularly scheduled office hours in 229 Straub Hall.

Preparation for Graduate Study

A bachelor’s degree is seldom sufficient qualification for professional work in psychology; at least a master’s degree is required for most positions. Students should not undertake graduate work unless their grades in undergraduate psychology and related courses have averaged mid-B (3.00) or better.

Prospective graduate students in psychology are advised to take courses in related fields such as anthropology, biology, computer science, chemistry, linguistics, mathematics, philosophy, physics, and sociology. Strong preparation in quantitative methods is advisable. Reading knowledge of at least one second language appropriate to psychology also may be useful.

Honors Curriculum

Students with excellent records who plan to pursue a career in psychology may consider applying to the departmental honors program upon completion of PSY 303. The honors program centers on an independent research project, which the student develops and carries out under the supervision of a departmental committee. Information about admission criteria and how to apply is available online, psychology.uoregon.edu/undergraduate/academics/honors-program.

Minor Requirements

Special Studies: [Topic] (PSY199) does not count toward the minor.

<table>
<thead>
<tr>

PSY459  Cultural Psychology
PSY461  Imagination
PSY468  Motivation and Emotion
PSY469  Psychopathology
PSY471  Personality
PSY472  Psychology of Trauma
PSY473  Marital and Family Therapies
PSY476  Language Acquisition
PSY478  Social Development
PSY480  Development and Psychopathology

Total Credits 28

All 28 credits must be taken for letter grades and passed with a C− or better. At least 16 credits must be upper-division courses taken in residence at the University of Oregon.

Middle and Secondary School Teaching Careers

The College of Education offers a fifth-year program for middle-secondary teaching in social studies. This program is described in the College of Education section of this catalog.

- Master of Arts
- Master of Science
- Doctor of Philosophy

Graduate Studies

The department emphasizes graduate work at the doctoral level, but an individualized master's degree program is available to a limited number of students.

Master's Degree Program

The individualized master's degree program does not lead to a PhD. The degree—either a master of arts (MA) or a master of science (MS)—requires 45 credits of course work. Program and application information may be obtained from the department website. Clinical training is not available in the master’s program.

Doctoral Degree Programs

The five chief PhD program options are clinical, cognitive-neuroscience, systems neuroscience, developmental, and social-personality.

The department maintains a psychology clinic; specialized facilities for child and social research; experimental laboratories for human research, and well-equipped animal laboratories.

Applicants to the PhD program in psychology must take the Graduate Record Examination (GRE) and provide official results to institute code 4846 and department code 2016. Applicants must also provide three letters of recommendation, curriculum vitae, writing sample, statement of purpose, and official transcripts from all colleges and universities attended. Instructions, deadlines, and a complete list of required materials may be obtained from the department website.

During the first year of graduate work, students acquire a broad background in psychology and are introduced to methods, research, and ethics. Each student’s program is planned in relation to background, current interests, and future goals. Research experience and a dissertation are required of PhD candidates; teaching experience is recommended, and opportunities to teach are available.

Requirements for Doctoral Students

PSY611–613  Data Analysis I-III  12
Three of five core courses
PSY607  Seminar: [Topic] (three terms: Research, Ethics, Research)  1-5
First-year research requirement
Supporting area requirement
Major preliminary examination
Additional course work required for students in the clinical program ¹
Doctoral dissertation

¹  See the Guide to the Clinical Psychology Program.

More detailed program and application information may be obtained from the department website.

For general regulations governing graduate work at the university, see the Graduate School section of this catalog.

Clinical Psychology

The clinical psychology program has been continuously accredited by the American Psychological Association since 1958 (Commission on Accreditation, American Psychological Association, 750 First Street NE, Washington, D.C. 20002-4242, 202-336-5979); it is also accredited by the Psychological Clinical Science Accreditation System, and is a member of the Academy of Psychological Clinical Science.

The program endorses a clinical scientist model for graduate training. This model emphasizes multilevel conceptualizations of psychopathology, comprising neurobiological, developmental, psychosocial, and multicultural perspectives. Doctoral students receive training in infant, child, and adult psychopathology; culture and diversity; infant, child, family, and adult assessment; and neuropsychology. All practicums and clinical training experiences have a strong focus on evidence-based treatments. Students receive training in the clinical techniques and practices as well as the methodology for development, implementation,
and evaluation of these interventions. Both psychotherapeutic interventions and prevention programs are included in the training.

The major goal of doctoral training is to support promising doctoral students in developing careers as scientist-practitioners. Students interested primarily in clinical practice would most likely prefer a program less research-oriented than the Oregon Clinical Psychology Training Program.

The research and clinical opportunities available to doctoral students depend on current activities of the clinical and departmental faculty, and may also encompass ongoing projects in research institutes located in the Eugene community that are affiliated with the clinical program. These institutions include the Oregon Research Institute, Oregon Social Learning Center, Decision Research, and Electrical Geodesics.

Members of the clinical faculty and other instructors with clinical interests have ongoing research in several areas, including the neurobiology of early stress, brain development and neural plasticity, behavior and molecular genetics, infant mental health, emotion and attention, prevention science, school readiness, child welfare system research, pubertal development and the transition to adolescence, depression, anxiety, personality measurement and theory, cognitive therapy, child and family assessment, social and emotional adjustment of children and adolescents, drug and alcohol abuse, cross-cultural psychology, sexual aggression, interpersonal violence, child abuse, institutional betrayal, and traumatic stress.

The department places a particularly high priority on translational research, encouraging multidisciplinary collaborations with colleagues from other areas of psychology and other academic departments. Currently, faculty research is funded by the National Science Foundation, National Institute of Mental Health, National Institute of Drug Abuse, National Institute on Child Health and Development, and the Institute of Education Sciences.

Additional information regarding course requirements for clinical students is provided in the Guide to the Clinical Program and the Doctoral Student Handbook, located on the department website.

Cognitive Psychology and Cognitive Neuroscience

The Department of Psychology at the University of Oregon has played an important role in the development of the field of cognitive neuroscience, and current researchers are continuing that tradition. Research areas include the cognitive and neural basis of perception, visual cognition, selective attention, working memory, long-term memory, executive control, action, language processing, and brain plasticity. Also under investigation are how these processes are altered by development in impoverished environments, aging, traumatic brain injury, autism, and other conditions. Studies employ a wide range of methods, including behavioral experiments, analyses of individual differences, functional imaging, electrophysiology, and transcranial magnetic and direct current stimulation.

The research efforts of the cognitive neuroscience laboratories benefit from the collaborative atmosphere at the University of Oregon, both within psychology and across other departments, allowing for the exploration of cognitive processes at many levels of analysis. Labs are located within the state-of-the-art facilities of the Robert and Beverly Lewis Integrative Science Building, in close proximity to the many other labs of the Institute of Neuroscience (http://www.neuro.uoregon.edu). The building also houses the Lewis Center for Neuroimaging (http://lcni.uoregon.edu), a research-dedicated facility with a 3T MRI scanner that supports ongoing research and training with functional and structural magnetic resonance imaging.

One of the most important aspects of the cognitive neuroscience graduate program is its informal atmosphere. At the same time, there is an emphasis on the development of imagination and intellectual independence. Students are encouraged to explore their research ideas from many different perspectives, with the assistance of the expertise from researchers in several labs within the Department of Psychology and the Institute of Neuroscience.

Developmental Psychology

The Department of Psychology has recently expanded the scope of its developmental psychology program with the addition of new faculty members and new emphases in the graduate curriculum. The department offers extensive coverage of development during infancy, childhood, and adolescence, with some additional interest in aging. Several areas of research are strongly represented, including cognitive development, socio-emotional development, developmental psychopathology, and developmental social and affective neuroscience.

Several exciting clusters of expertise exist within these broad areas. Research on theory of mind and perspective-taking as well as imagination and creativity links to research on the development of executive functioning and self-regulation. This cluster also dovetails with research on self-evaluation; affective and appetitive motivations, and decision-making. Yet another active area of work looks at infant processing of action, language, and the statistical and temporal properties of everyday visual and linguistic environments. In addition, many researchers share a strong interest in social contextual effects on infant, child, and adolescent well-being, ranging from the small-scale (familial and peer influences, early adversity) to the large (cultural and global contexts of development).

Members of the developmental psychology faculty also have strong collaborative links with the Oregon Social Learning Center (http://psi.uoregon.edu), Oregon Research Institute (http://www.ori.org), and the interdisciplinary Institute of Cognitive and Decision Sciences (http://icds.uoregon.edu). Current and previous funding sources for the faculty and students in developmental psychology include the National Science Foundation, the National Institute on Drug Abuse, the Eunice Kennedy Shriver National Institute of Child Health and Human Development, the National Institute of Mental Health, and the Oregon Medical Research Foundation. Graduates from the program have risen to faculty and postdoctoral positions at the University of Minnesota, Swarthmore College, Queen's University, Vanderbilt University, the University of California at Davis, the University of Michigan, Hamilton College, the University of Utah, Oregon Health and Science University, the University of Oregon, and Brown University, among others.

Social and Personality Psychology

Research in social and personality psychology at the University of Oregon reflects an intellectually diverse approach to understanding intrapersonal and interpersonal processes and individual differences. The program concentrates on high-quality research and training combined with substantive and methodological breadth. Faculty members conduct research spanning a broad spectrum of human behavior using innovative approaches. Areas of particular focus include...
• Emotion and motivation—emotion regulation, social functions of emotions, self-regulation, goal pursuit, stress and physiology
• Self- and social cognition—self-perception and interpersonal perception, perspective-taking and empathy, self-other comparisons
• Groups, networks, and organizations—status hierarchies, social power, psychology of war and sociopolitical violence, group dynamics, online social networks
• Culture, values, and worldviews—moral psychology, culture and belief systems, psychology of religion
• Personality structure and development—structure of personality attributes, culture and personality description, lifespan development
• Decision-making and risk perception—neuroeconomics and valuation, social and financial decision-making, decision-making in applied contexts (e.g., legal, aviation, risk assessment)

Research in these areas draws upon a wide range of methods, including dyadic and group methods, psychophysiology, neuroimaging, neuroendocrinology, experience sampling, longitudinal studies, surveys, computational methods, and field studies. Students have the opportunity to develop their skills through course work and through collaboration with faculty mentors.

Training in the program exposes students to a wide range of topics through small seminars, lab meetings, and a variety of other opportunities. Students often work with multiple instructors and researchers, including faculty members from other areas of psychology, from other departments and units on campus, and from other institutions. Students may flexibly tailor their own graduate program under the guidance of faculty advisors, making the social and personality psychology program a distinctive training experience for each graduate student.

Courses

PSY199. Special Studies: [Topic]. 1-5 Credits.
Repeatable.

PSY201. Mind and Brain. 4 Credits.
Introduction to perception, memory, learning, and cognition.

PSY202. Mind and Society. 4 Credits.
Introduction to topics in clinical, personality, social, and developmental psychology.

PSY302. Statistical Methods in Psychology. 4 Credits.
Probability and statistics applied in psychological research. Topics include descriptive statistics, hypothesis testing, correlation, regression, and design of experiments. With laboratory. Prereq: MATH 111 or 243; WR 121; pre- or coreq: PSY 201, 202. Sophomore standing.

PSY303. Research Methods in Psychology. 4 Credits.
Use of library and bibliographic methods, handling of survey data, coding, interviews, standardized tests, and experiments. Prereq: PSY 201, 202, 302; WR 122 or 123.

PSY304. Biopsychology. 4 Credits.
Relationships between brain and endocrine activity and behavior. Topics include sensation, perception, sexual behavior, drug effects, eating, drinking, sleeping, dreaming, and learning.

PSY330. Thinking. 4 Credits.
Psychological methods involved in problem solving, complex learning, and various forms of rational and irrational reasoning and belief systems.

PSY348. Music and the Brain. 4 Credits.
Explores the neural correlates of our perception of tonality, harmony, melody, and rhythm and how these relate to neurobiology, brain damage, and cognitive neuroscience.

PSY366. Culture and Mental Health. 4 Credits.
Role of culture in the definition and maintenance of mental health and the definition and treatment of mental illness.

PSY376. Child Development. 4 Credits.
Survey of social, intellectual, and personality development in infancy, childhood, and adolescence.

PSY380. Psychology of Gender. 4 Credits.
Critical analysis of evidence for sex differences, gender roles, and the effect of gender on traditional issues in psychology. Topics include parenthood, violence, and sexual orientation.

PSY383. Psychoactive Drugs. 4 Credits.
Physiological and behavioral effects of psychoactive drugs such as alcohol, opiates, barbiturates, and excitants. The psychology of use and overuse; therapies for correcting drug problems.

PSY388. Human Sexuality. 4 Credits.
The nature of human sexuality; hormonal, instinctual, and learned factors in sexuality; psychosexual development; sexual orientation; frequency and significance of various types of sexual behavior; sexual inadequacy; sexual deviation.

PSY399. Special Studies: [Topic]. 1-5 Credits.
Repeatable.

PSY401. Research: [Topic]. 1-21 Credits.
Repeatable.

PSY403. Thesis. 1-12 Credits.
Repeatable.

PSY405. Reading and Conference: [Topic]. 1-21 Credits.
Repeatable.

PSY406. Field Studies: [Topic]. 1-21 Credits.
Repeatable.

PSY407. Seminar: [Topic]. 1-5 Credits.
Repeatable.

PSY408. Laboratory Projects: [Topic]. 1-9 Credits.
Repeatable.

PSY409. Practicum: [Topic]. 1-9 Credits.
Repeatable.

PSY410. Experimental Course: [Topic]. 1-5 Credits.
Repeatable.

PSY412. Applied Data Analysis. 4 Credits.
Intermediate-level practical data analysis and interpretation. Topics include experimental design, analysis of variance, multiple regression, exploratory data analysis. Extensive computer use. Honors only. Prereq: PSY 303.

PSY420. Psychology and Law. 4 Credits.
Introduction to topics of concern to both psychology and the law. Includes eyewitness identification, legal decision-making, criminal defenses, profiling, polygraphy, and mental-health law. Prereq: PSY 303.
PSY433. Learning and Memory. 4 Credits.
Processes underlying learning and memory, including evolution. Topics range from simple forms of behavior change to the acquisition, retention, forgetting, and retrieval of symbolic information.
Prereq: PSY 303.

PSY435. Cognition. 4 Credits.
Issues of memory; coding for storage, control processes for storage; attention and cognitive control; analysis of more complex cognitive tasks; approaches to problem solving.
Prereq: PSY 303.

PSY436. Human Performance. 4 Credits.
Motor and intellectual capacities; analysis of the flow of information within the nervous system; applications of performance principles to human-machine systems.
Prereq: PSY 303.

PSY438. Perception. 4 Credits.
Topics covered are color, size, shape, depth, distance, and movement. Examines the relationships between stimuli and perception, stimuli and the neural response, and the neural response and perception.
Prereq: PSY 303.

PSY440. Psycholinguistics. 4 Credits.
Processes and structures underlying language use. Methods of studying language processing. Relationships between psycholinguistic data and observations from linguistics and neurophysiology.
Prereq: PSY 303.

PSY445. Brain Mechanisms of Behavior. 4 Credits.
Organization of the mammalian brain. Structure and function of the neuronal systems underlying vision, perception, motivation, coordinated movement, sleep-wakefulness, learning and memory, and affective disorders.
Prereq: PSY 303, 304.

PSY449. Human Neuropsychology. 4 Credits.
Integrative neural mechanisms of normal and abnormal processes in systems (e.g., selective attention, language, memory, object recognition, and emotion).
Prereq: PSY 303, 304.

PSY450. Hormones and Behavior. 4 Credits.
Prereq: PSY 303.

PSY455. Social Psychology. 4 Credits.
Processes underlying social perception and social interaction. Topics include aggression, the self-concept, stereotyping and prejudice, conformity, persuasion, attraction, and helping.
Prereq: PSY 303.

PSY456. Decision-Making. 4 Credits.
Psychological processes involved in judgment and decision-making. Normative theories of ideal behavior contrasted with descriptive analysis of actual behavior.
Prereq: PSY 303.

PSY459. Cultural Psychology. 4 Credits.
Examines interdependence between mind and culture in substantive domains such as social cognition, motivation, emotion, and psychopathology. Cultural pluralism, collective identities, tolerance, and diversity considered.
Prereq: PSY 303.

PSY461. Imagination. 4 Credits.
Topics in human imagination, including creativity, children's pretend play, fiction writing, imagery, mental time travel, consciousness, dreaming, virtual worlds, and disorders of the imagination.
Prereq: PSY 303.

PSY468. Motivation and Emotion. 4 Credits.
Adaptive human behavior; considers biological processes involved in emotions, how emotions interact with cognition, and social influences.
Prereq: PSY 303.

PSY469. Psychopathology. 4 Credits.
Major descriptive and theoretical approaches to etiological, developmental, and social factors in emotion and personality disorders. Includes assessment, diagnosis, treatment, and special topics.
Prereq: PSY 303.

PSY471. Personality. 4 Credits.
Theory and methods for studying human traits, including personality measures and tests; studies of age, gender, and culture. Current research in personality.
Prereq: PSY 303.

PSY472. Psychology of Trauma. 4 Credits.
Cognitive, neuropsychological, developmental, social, and clinical approaches to understanding trauma. Includes analysis of childhood trauma, sexual assault, domestic violence, terrorism, combat, and natural disasters.
Prereq: PSY 303.

PSY473. Marital and Family Therapies. 4 Credits.
Prereq: PSY 303.

PSY475. Cognitive Development. 4 Credits.
Intellectual development in children from infancy to adolescence with a focus on early childhood. Topics covered include perception, attention, memory, reasoning, conceptual structure, social cognition.
Prereq: PSY 303.

PSY476. Language Acquisition. 4 Credits.
How children acquire language from the earliest speech sounds to full sentences. Topics include babbling, first words, word combinations, the relationship between cognition and language development.
Prereq: PSY 303.

PSY478. Social Development. 4 Credits.
Theoretical issues and empirical studies of social-emotional development. Topics may include attachment, temperament, moral development, family interaction, self-image, aggression, and sex-role development.
Prereq: PSY 303.

PSY480. Development and Psychopathology. 4 Credits.
Biological and environmental factors that shape normal and abnormal development. Analysis of how family functioning affects psychopathology and resilience in children and adolescents.
Prereq: PSY 303.
PSY490. Honors in Psychology. 1 Credit.
Repeatable. Reading and conference. Repeatable twice for maximum of 3 credits each.
Prereq: Honors psychology majors only.

PSY491. Honors in Psychology. 1 Credit.
Repeatable. Reading and conference. Repeatable twice for maximum of 3 credits each.
Prereq: Honors psychology majors only.

PSY492. Honors in Psychology. 1 Credit.
Repeatable. Reading and conference. Repeatable twice for maximum of 3 credits each.
Prereq: Honors psychology majors only.

PSY503. Thesis. 1-16 Credits.
Repeatable.

PSY507. Seminar: [Topic]. 1-5 Credits.
Repeatable.

PSY510. Experimental Course: [Topic]. 1-5 Credits.
Repeatable.

PSY512. Applied Data Analysis. 4 Credits.
Intermediate-level practical data analysis and interpretation. Topics include experimental design, analysis of variance, multiple regression, exploratory data analysis. Extensive computer use.

PSY520. Psychology and Law. 4 Credits.
Introduction to topics of concern to both psychology and the law. Includes eyewitness identification, legal decision-making, criminal defenses, profiling, polygraphy, and mental health law.

PSY533. Learning and Memory. 4 Credits.
Processes underlying learning and memory, including evolution. Topics range from simple forms of behavior change to the acquisition, retention, forgetting, and retrieval of symbolic information.

PSY535. Cognition. 4 Credits.
Issues of memory; coding for storage, control processes for storage; attention and cognitive control; analysis of more complex cognitive tasks; approaches to problem solving.

PSY536. Human Performance. 4 Credits.
Motor and intellectual capacities; analysis of the flow of information within the nervous system; applications of performance principles to human-machine systems.

PSY538. Perception. 4 Credits.
Topics covered are color, size, shape, depth, distance, and movement. Examines the relationships between stimuli and perception, stimuli and the neural response, and the neural response and perception.

PSY540. Psycholinguistics. 4 Credits.
Processes and structures underlying language use. Methods of studying language processing. Relationships between psycholinguistic data and observations from linguistics and neurophysiology.

PSY545. Brain Mechanisms of Behavior. 4 Credits.
Organization of the mammalian brain. Structure and function of the neuronal systems underlying vision, perception, motivation, coordinated movement, sleep-wakefulness, learning and memory, and affective disorders.

PSY549. Human Neuropsychology. 4 Credits.
Integrative neural mechanisms of normal and abnormal processes in systems (e.g., selective attention, language, memory, object recognition, and emotion).

PSY550. Hormones and Behavior. 4 Credits.

PSY556. Social Psychology. 4 Credits.
Processes underlying social perception and social interaction. Topics include aggression, the self-concept, stereotyping and prejudice, conformity, persuasion, attraction, and helping.

PSY557. Group Dynamics. 4 Credits.
Topics in small-group dynamics, including decision-making, conflict, and changes over time in group structure and behavior.

PSY558. Decision-Making. 4 Credits.
Psychological processes involved in judgment and decision-making. Normative theories of ideal behavior contrasted with descriptive analysis of actual behavior.

PSY559. Cultural Psychology. 4 Credits.
Examines interdependence between mind and culture in substantive domains such as social cognition, motivation, emotion, and psychopathology. Cultural pluralism, collective identities, tolerance, and diversity considered.

PSY568. Motivation and Emotion. 4 Credits.
Adaptive human behavior; considers biological processes involved in emotions, how emotions interact with cognition, and social influences.

PSY569. Psychopathology. 4 Credits.
Major descriptive and theoretical approaches to etiological, developmental, and social factors in emotion and personality disorders. Includes assessment, diagnosis, treatment, and special topics.

PSY571. Personality. 4 Credits.
Theory and methods for studying human traits, including personality measures and tests; studies of age, gender, and culture. Current research in personality.

PSY572. Psychology of Trauma. 4 Credits.
Cognitive, neuropsychological, developmental, social, and clinical approaches to understanding trauma. Includes analysis of childhood trauma, sexual assault, domestic violence, terrorism, combat, and natural disasters.

PSY573. Marital and Family Therapies. 4 Credits.

PSY575. Cognitive Development. 4 Credits.
Intellectual development in children from infancy to adolescence with a focus on early childhood. Topics covered include perception, attention, memory, reasoning, conceptual structure, social cognition.

PSY576. Language Acquisition. 4 Credits.
How children acquire language from the earliest speech sounds to full sentences. Topics include babbling, first words, word combinations, the relationship between cognition and language development.

PSY578. Social Development. 4 Credits.
Theoretical issues and empirical studies of social-emotional development. Topics may include attachment, temperament, moral development, family interaction, self-image, aggression, and sex-role development.

PSY580. Development and Psychopathology. 4 Credits.
Biological and environmental factors that shape normal and abnormal development. Analysis of how family functioning affects psychopathology and resilience in children and adolescents.
PSY601. Research: [Topic]. 1-21 Credits.
Repeatable.

PSY602. Supervised College Teaching. 1-3 Credits.
Repeatable.

PSY603. Dissertation. 1-16 Credits.
Repeatable.

PSY605. Reading and Conference: [Topic]. 1-21 Credits.
Repeatable.

PSY607. Seminar: [Topic]. 1-5 Credits.
Repeatable.

PSY609. Practicum: [Topic]. 1-9 Credits.
Repeatable.

PSY610. Experimental Course: [Topic]. 1-21 Credits.
Repeatable.

PSY611. Data Analysis I. 4 Credits.
Introduction to probability, hypothesis testing, and analysis of variance with applications. Includes training in the statistical analysis of data by computer. With laboratory.

PSY612. Data Analysis II. 4 Credits.
Multiple regression and advanced topics in analysis of variance. Includes training in the statistical analysis of data by computer. With laboratory.
Prereq: PSY 611.

PSY613. Data Analysis III. 4 Credits.
Multivariate techniques including MANOVA, factor analysis, principal components. Includes training in the statistical analysis of data by computer. With laboratory.
Prereq: PSY 612.

PSY620. Psychopathology. 3 Credits.
Definition, measurement, and diagnosis of deviant behavior; includes critical reviews of research on the etiology, intervention, and outcome of major mental disorders.
Prereq: major standing.

PSY621. Clinical Psychobiology. 3 Credits.
Research and theory from the neurosciences applied to clinical problems and biological therapies.
Prereq: major standing.

PSY704. Internship: [Topic]. 1-15 Credits.
Repeatable.
