Sociology is the analytical study of human groups and societies—how they develop, how they are structured, and how they function. Like human society itself, the field of sociology is extremely broad. Sociologists study the social world, from small groups of friends and families to formal organizations, such as universities and corporations, to entire nations. In addition, scholars of sociology look at social relationships and interactions, at power and conflict, at the structures that hold societies together, and at how those societies change.

Undergraduate Studies

Sociology is the analytical study of the development, structure, and function of human groups and societies. It is concerned with the scientific understanding of human behavior as it relates to, and as a consequence of, interaction within groups. The undergraduate program in the Department of Sociology provides a broad understanding of human society for students in every field and integrated programs for majors in sociology.

Preparation

High school students planning to major in sociology should take courses in history and social studies; in addition, a course in statistics should be considered. Substantial work in English composition, mathematics, and second languages is also desirable. Two-year transfer students are advised to come with a year’s work in introductory sociology courses as well as courses that fulfill university group requirements.

Careers

Recent graduates with bachelor’s degrees in sociology are found in all the pursuits traditionally open to liberal-arts graduates—especially social service, management, marketing, teaching, library, and research-statistics occupations in industries related to health, education, business, government, and the environment. Some graduates seek additional training in graduate professional schools of social work, business administration, and law. A bachelor’s degree alone is seldom sufficient to allow a person to enter a professional career as a sociologist. Students who seek careers as social scientists enter graduate programs in sociology or related fields.

Curriculum

Undergraduate courses in sociology are offered at three levels. Courses at the 200 level provide an introduction to the field. Basic courses are Introduction to Sociology (SOC 204) and Social Inequality (SOC 207). Completion of one 200-level course is a major requirement. One must also be taken to advance to some 300-level courses.

Courses at the 300 level extend the student’s knowledge of subjects covered in the 200-level courses and provide an introduction to social research methods and social theory.

Courses at the 400 level are advanced and specialized. Most build on background obtained in the 200- and 300-level courses. As prerequisites for enrollment in some 400-level courses, students must successfully complete one or more of the core courses: Social Theory (SOC 310), Research Methods (SOC 311), Statistical Analysis in Sociology (SOC 312). Upper-division (300- and 400-level) classes are usually smaller in size than the lower-division classes and provide more opportunity for faculty-student interaction.

Courses used to satisfy major requirements must be taken for letter grades and passed with grades of C– or better; at least a 2.00 grade point average (GPA) must be achieved in these courses. Four credits from a course not numbered 401–409 may be taken pass/no pass (P/N); P grades must be earned to apply them to the major.

Courses numbered 401–406 may be taken pass/no pass (P/N); P grades must be earned to apply them to the major. No more than 8 credits from these courses may be applied to the major.

General Sociology

Work in sociology begins with Introduction to Sociology (SOC 204) or Social Inequality (SOC 207), both of which provide an introduction to the discipline. They emphasize how sociology can be applied to contemporary social issues. Students specializing in general sociology move on to courses that provide a more in-depth study of social institutions. Courses on social stratification, social psychology, social change, and sociological theory help to tie these diverse areas together by providing perspectives that are useful in the study of any institutional area. Finally, courses in methodology and statistics provide a tool kit of analytical and research skills that are useful both in sociology courses and in whatever activities the student pursues after graduation.
Minor Requirements

The minor in sociology complements a major in another discipline. Courses used to satisfy requirements for the minor must be taken for letter grades and passed with grades of C– or better.

- Of the 24 credits required in sociology courses, 12 must be upper division
- 12 credits must be taken in residence at the University of Oregon; 8 of those credits must be upper division
- No more than 8 credits from the sociology minor may be used to complete the requirements of another major or minor

Advising

Academic advising in sociology is provided by Elizabeth Milner, a full-time staff member. The advising office is in 707 Prince Lucien Campbell Hall; Elizabeth may be reached at emilner@uoregon.edu or 541-346-1181.

Career Advising is available through Bill Sherman (405 Prince Lucien Campbell Hall) and Amy Luebbers (631 Prince Lucien Campbell Hall).

The department also maintains an active peer advising program for undergraduate students. Peer advisors keep regular office hours in the peer advising office, 706 Prince Lucien Campbell Hall.

Career Planning

With the help of advisors, each student should select courses that emphasize experiences most useful for the student’s educational and career objectives. Students with specific career plans may also go to the Career Center, 220 Hendricks Hall, for advice about suitable course programs.

When planning a program, students should keep in mind the ways in which major requirements fit with career objectives.

Social Service Professions

Social service professions include social work, work in nonprofit organizations, counseling, community relations, housing, labor relations, and human resources. Sociology majors who want to enter a helping profession should take at least one course each in sociological methodology and social psychology and several courses dealing with social issues and problems.

Students may supplement their programs with courses in the psychology and political science departments and in the College of Education. Many of these occupations require graduate or field training. Students can get more detailed information from the Career Center.

Business or Government Service

Business or government organizations typically require general human-relations skills, some awareness of organizations and the surrounding social environment, and an ability to analyze and understand basic social data.

Students interested in business should include in their programs courses in methodology, social psychology, and organizations and occupations. Programs may be supplemented with courses in the Lundquist College of Business and in the Department of Economics.

Students with career goals in governmental service should include courses in community, urban affairs, population, and resources; social psychology; organizations and occupations; and methodology. Related courses in the economics, political science, and planning, public policy and management departments also are useful.

Honors in Sociology

Motivated students may participate in the honors program in sociology. Qualified students work closely with faculty members and fellow honors students on a yearlong project of their own design, and write an honors thesis. The thesis may be based on existing data or data collected by the student.

Students who successfully complete the honors program are awarded honors based on the evaluation of the quality of their work by their advisors and the honors program advisor. The honors distinction is noted on the student’s official transcript and diploma.

Applicants to the honors program must demonstrate a high level of competence and motivation for advanced studies in sociology. A GPA of no less than 3.40 in sociology courses or a nomination by two faculty members is required for admittance, but does not guarantee acceptance. Students selected for the program are notified during spring term of their sophomore or junior year. Application forms are available in the sociology department office or the department’s web page. Students also receive an e-mail describing the application process in the spring term.

During fall and winter terms of the senior year, honors students take part in the honors thesis seminar, Seminar: [Topic] (SOC 407), and also enroll in Thesis (SOC 403). In fall term, they work closely with the course instructor, the individual thesis advisor, and other students to refine research questions and design. By the end of the term, each student submits a thesis proposal for approval. During winter term, students work with the course instructor and classmates to collect data and begin their analysis. In the spring term, working with their thesis advisors, students complete, publicly present, and submit their theses.

Twelve credits of sociology degree requirements are earned through the honors program: 8 credits of SOC 403 and 4 credits of SOC 407. The SOC 407 credits count toward the 400-level requirement for the major.

Preparing for Graduate Study

Students planning graduate work in sociology should have a strong background in sociological theory and social research methods well beyond courses required for the major. Besides taking advanced courses
in areas of special interest to them, students should take a substantial number of upper-division courses in other social sciences.

Applications to graduate school should be made in fall or winter the year before the student plans to enter a graduate program. Students considering graduate school should talk to their faculty advisors before their final year of school about programs at various schools, experiences that increase chances for admission, and requirements for students in graduate programs in sociology.

**Kindergarten through Secondary Teaching Careers**

Students who complete a degree with a major in sociology are eligible to apply to the College of Education’s fifth-year program for a license in middle-secondary teaching or the fifth-year program for a license in elementary teaching. Refer early to information in the **College of Education** section of this catalog.

**Four-Year Degree Plan**

*The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them.*

### Graduate Studies

The graduate training program in sociology is designed for students who wish to obtain a doctor of philosophy (PhD) in preparation for professional careers in teaching and research. The program is not intended for a terminal master’s degree.

Students who seek an advanced degree in sociology should have achieved a grade point average (GPA) of 3.00 or better in their undergraduate work in the social sciences. Admission is not restricted to students with undergraduate majors in sociology.

Information describing the graduate program, materials needed to apply for admission, specific course requirements, and a list of faculty members and their research interests is available on the department’s website. The application deadline is January 15.

All students who remain in good academic standing receive five years of guaranteed funding from the department as graduate employees (GEs), and are often employed beyond the guaranteed employment. Some graduate students hold part-time teaching and research appointments outside the department.

### Curriculum

All graduate-level courses taken to meet requirements are taken for letter grades except for the following courses:

### Master’s-Level Requirements

Students typically complete 55 credits of master’s-level requirements in the first six terms of full-time work. Students are awarded a master’s degree if they have completed their required courses, achieved a mid-B
or better average in their graded courses, and passed the master’s paper requirement. Students who enter with a master’s degree in sociology may request substitution of as many as five courses from their previous institutions to meet programmatic requirements.

**Doctoral-Level Requirements**

After earning the master’s degree, students take an additional 20 credits of doctoral-level course work and prepare for a comprehensive examination in a sociological subfield chosen jointly by the student and the advisor.

Upon passing the comprehensive examination, the student is advanced to PhD candidacy and begins work on the doctoral dissertation. The final product is a book-length manuscript presenting empirical research that demonstrates originality and the scholar’s ability to conduct independent investigation.
