

Computer Science Minor

The minor in computer science introduces the theories and techniques of computer science and develops programming skills that are applicable to the student's major. It is a strong complement to a major in any of the sciences and in other related fields such as multimedia, economics, digital humanities, data science, and more. Students from all majors have found their career opportunities enhanced through the CS minor.

Before enrolling in upper-division courses, students planning a minor in computer science must file an application form with the department. Each student should consult with a CS faculty advisor to plan the minor program.

Computer Science Minor Requirements

Computer Science I (CS 210), Computer Science II (CS 211), Computer Science III (CS 212), Elements of Discrete Mathematics I (MATH 231), and Elements of Discrete Mathematics II (MATH 232) must be passed with grades of B- or better before students can take the upper-division core courses.

Code	Title	Credits
Lower-Division Courses		
CS 210–212	Computer Science I-III	12
MATH 231–232	Elements of Discrete Mathematics I-II	8
Upper-Division Courses		
CS 313	Intermediate Data Structures	4
Electives ¹		8
Total Credits		32
