The Department of Global Studies (formerly the Department of International Studies) offers bachelor of arts (BA), bachelor of science (BS), and master of arts (MA) degrees in global studies and minors in global studies and global health. The programs are tailored to give students the theoretical tools to make sense of the fast-changing global arena; ensure the practical application of their research; immerse them in the language, history, and culture of a major world region; ensure they live, study, conduct research, or hold an internship that enhances their intercultural knowledge, understanding, and skills; and help them develop a professional concentration area suitable for their career goals. For the Global Studies undergraduate programs, professional concentration and geographic focus options are listed in the Undergraduate section of the department page.

The Department of Global Studies is a member of the Association of Professional Schools of International Affairs and the International Studies Association. These associations provide more opportunities in research, internships, funding, and employment for global studies students.

Advising

Advising about specific major requirements is provided by Global Connections Advisors in the Tykeson College & Career Advising unit. Regular consultation with the Global Connections Advisors is strongly recommended for majors, premajors, and minors. Additionally, the role of the faculty mentor is central to the program. Students applying to the major are required to choose a faculty member with whom they have a common area of interest to act as their mentor, typically one of the core or participating faculty members named in the departmental faculty list or a faculty member from the student's concentration areas, professional or geographic.

Admission

The first step for students planning to major in global studies is to declare the premajor. Students should make an appointment with a Global Connections Advisor to declare the premajor. Global studies premajors must first complete the requirements listed below before they can apply to the global studies major.

Students must maintain a grade point average of 3.00 (cumulative) or higher than 3.00 for three consecutive terms prior to the term of application.

Courses required for the premajor must be passed with a C– or better. Freshman seminars do not count toward this requirement. Students are strongly encouraged not to wait until their junior or senior year to apply. Premajor advising and help with the application process are available via appointments made with Global Connections Advisors in the Tykeson College & Career Advising unit. Applicants are required to meet with a Global Connections Advisor as part of the major application process. Applications are due on Monday of the fourth week of fall, winter, and spring terms.

In exceptional cases (and to accommodate transfer students), students entering the university may apply to become a global studies major without completing the required two terms. More information is available from the director of undergraduate studies.

or WR 123	College Composition III	

Additional Requirements

Courses must be passed with grades of C– or better to satisfy major requirements. In addition, three years' proficiency in a second language is required (see below for details).

Courses applied to the major, with the exception of the language requirement and up to 8 credits in or , must be taken for letter grades.

A maximum of 12 credits in courses taken to fulfill the university group requirements may be applied toward the global studies major.

A maximum of 20 credits in courses taken in a single department other than global studies may be applied toward the global studies major, exclusive of the language requirement and the External Block B Professional Concentration option.

For the most current information about courses and requirements, visit the department website.

Language Requirement

To satisfy this requirement, students must achieve proficiency in a second language at a level associated with three years of study. Proficiency in the language may be demonstrated by passing three terms of a 300-level language sequence , by an examination, or by graduating from a high school in which English was not the medium of instruction.

A student may also fulfill the language requirement with two years' proficiency in two different languages exclusive of the student's native language. Students wishing to pursue this option must get approval from the director of undergraduate studies faculty.

Intercultural Experience

Majors must have a significant immersive intercultural experience to complete requirements for the major. One way that this can be satisfied is with at least one term (ten weeks) of study or work in another country that coincides with the student's geographic focus area. Contact the departmental advising office for information about other ways to satisfy this requirement. For information about study in another country, see Study Abroad in the **Supplementary Academic Programming** section of this catalog. Advice is available from the Office of International Affairs, 330 Oregon Hall. *Domestic (US-based) cultural experiences and internships must be preapproved by the advising team.*

Internship Option

Students may earn pass/no pass (P/N) credit for work done as interns. Interested students should consult with global studies advisors.

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them.

Bachelor of Arts in Global Studies

Below is an example of how to complete a BA in global studies with a diplomacy and international relations professional concentration and a Middle East geographic focus. Since the major offers 16 options for professional concentration areas and seven different geographic focus regions, with a wide variety of courses that can count toward each concentration, there are innumerable paths through the global studies major.

This degree plan is for general planning purposes only and, due to the interdisciplinary nature of the major, it is imperative that students speak with advisors to determine which courses would best match their personal, professional, and academic goals.
