

Sustainable Business Minor

The minor in sustainable business is designed for non-business majors who want to learn to apply business solutions to address social and environmental challenges. The sustainable business minor teaches students how to use the power of business for good, finding ways to make the world better for everyone.

The minor in sustainable business is open to students from all majors except pre-business, business administration, or accounting. For general social sciences majors with a concentration in applied economics, business, and society, students must adhere to the GSS double-dipping policy. See the GSS website (<https://gss.uoregon.edu/faqs/>) for more information. Completing the minor requires 24 credits of course work, which can be completed in one academic year.

Students may declare a minor in sustainable business online on the college's website, where a checklist of requirements can be found. Advising assistance is available in the Office of Undergraduate Advising.

The sustainable business minor consists of three business administration courses, two courses from specialized clusters, and one elective (total of 24 credit hours).

Code	Title	Credits
BA 101	Introduction to Business	4
MGMT 250	Introduction to Sustainable Business	4
