GSL 290. Introduction to Epidemiology. 4 Credits.

This course provides an introduction to the basic principles and methods of epidemiology. Epidemiology is the study of the distribution and determinants of health and disease in populations, and it is considered a cornerstone of public health. Topics covered include study designs, infectious disease epidemiology and pandemics, and chronic disease, environmental, and social epidemiology. This course will strengthen your ability to think critically about population health, with an eye toward health equity and justice.

GSL 335. Global Perspectives in Food and Film. 4 Credits.

In this class we will highlight the power of documentary films to disseminate information about food systems, sustainability, and health in our media-saturated world. Using food as a lens, we will critically examine films within their social, cultural, and global contexts.

Repeatable 99 times when topic changes

GSL 440. Methods in Food Systems Studies. 4 Credits.

This course provides a hands-on introduction to the social scientific, linguistic, and humanistic study of food, foodways, and food systems. Each class session will combine a theoretical discussion of a particular methodology, a survey of its usage through diverse case studies, and a chance to experiment with the methodology in individual and small groups.
