

# Art (BA/BS)

As an art student, you will learn to think critically, communicate clearly, and work creatively. With studio practice and interdisciplinary work you will develop an understanding of materials and tools, technical skills, strategies of experimentation, as well as fluency in visual languages and articulating meaning.

The art curriculum includes core art foundation courses, art history, and studio art in art and technology, ceramics, fibers, jewelry and metalsmithing, painting and drawing, photography, printmaking, and sculpture. While all art majors share the basic requirements, you have the flexibility to pursue advanced course work in the areas of your primary interests.

## Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Demonstrate technical and material competency
- Demonstrate visual literacy
- Understand historical and cultural context from a variety of perspectives
- Exercise critical thinking, analysis and discourse
- Synthesize technical and conceptual understanding into an independent art making practice
